

Greenhouse gas emissions intensity

CLP Power Hong Kong – GHG emissions intensity of electricity sold

1. In 2024, in accordance with the Greenhouse Gas Protocol, direct CO_2 emissions from WE Station's landfill gas from waste for power generation are not included in CLP's Scope 1 CO_2 and CO_2e emissions inventory and are reported separately. The CO_2 emissions from the WE Station's landfill gas combustion is 28kt. Its non- CO_2 GHG emissions (i.e. CH_4 and N_2O) are included in CLP's Scope 1 CO_2e emissions.
2. "Electricity sold" is the total electricity energy sold to CLP Power Hong Kong Limited's customers before the adjustment of Renewable Energy Certificates.
