

## Greenhouse gas emissions intensity

CLP Group – GHG emissions intensity of generation and energy storage portfolio

- 1. Paguthan Power Station, the power purchase agreements of which expired in December 2018, was not included in the 2020-2024 numbers.
- 2. In 2024, in accordance with the Greenhouse Gas Protocol, direct CO<sub>2</sub> emissions from Jhajjar Power Station's biomass combustion and WE Station's landfill gas from waste for power generation are not included in CLP's Scope 1 CO<sub>2</sub> and CO<sub>2</sub>e emissions inventory and are reported separately. The CO<sub>2</sub> emissions from Jhajjar Power Station's biomass combustion is 267kt, while the CO<sub>2</sub> emissions from the WE Station's landfill gas combustion is 28kt. Both assets' non-CO<sub>2</sub> GHG emissions (i.e. CH<sub>4</sub> and N<sub>2</sub>O) are included in CLP's Scope 1 CO<sub>2</sub>e emissions.
- 3. Numbers include Scope 1 and Scope 2 emissions on an equity basis.
- 4. Numbers include Scope 1, Scope 2 and Scope 3 Category 3 emissions (direct emissions from generation of purchased electricity that is sold to CLP's customers) on an equity plus capacity and energy purchase basis.
