

## CLP Group's generation and energy storage portfolio

CO<sub>2</sub>e – on an equity plus long-term capacity and energy purchase basis

● CO<sub>2</sub>e – on an equity plus long-term capacity and energy purchase basis

1. In accordance with the Greenhouse Gas Protocol, direct CO<sub>2</sub> emissions from Jhajjar Power Station's biomass combustion and WE Station's landfill gas from waste for power generation are not included in CLP's Scope 1 CO<sub>2</sub>e emissions inventory and are reported separately. In 2025, the CO<sub>2</sub> emissions from Jhajjar Power Station's biomass combustion are 296kt, while the CO<sub>2</sub> emissions from the WE Station's landfill gas combustion are 35kt. Both assets' non-CO<sub>2</sub> GHG emissions (i.e. CH<sub>4</sub> and N<sub>2</sub>O) are included in CLP's Scope 1 CO<sub>2</sub>e emissions.
2. Numbers include Scope 1, Scope 2 and Scope 3 Category 3 emissions (direct emissions from the generation of purchased electricity that is sold to CLP's customers).
