

Greenhouse gas emissions intensity

CLP Power Hong Kong – GHG emissions intensity of electricity sold

CO₂e emissions intensity of electricity sold by CLP Power Hong Kong

1. "Electricity sold" is the total electricity energy sold to CLP Power Hong Kong Limited's customers before the adjustment of Renewable Energy Certificates.
2. In accordance with the Greenhouse Gas Protocol, direct CO₂ emissions from WE Station's landfill gas from waste for power generation are not included in CLP's Scope 1 CO₂e emissions inventory and are reported separately. In 2025, the CO₂ emissions from the WE Station's landfill gas combustion are 35kt. Its non-CO₂ GHG emissions (i.e. CH₄ and N₂O) are included in CLP's Scope 1 CO₂e emissions.
